# Aries Radio manual installation guide

1. Unzip the file AriesWingsRadio.zip in a folder of your choice
2. Create a new folder named AriesWings under C:\Program Files\Eagle Dynamics\DCS World

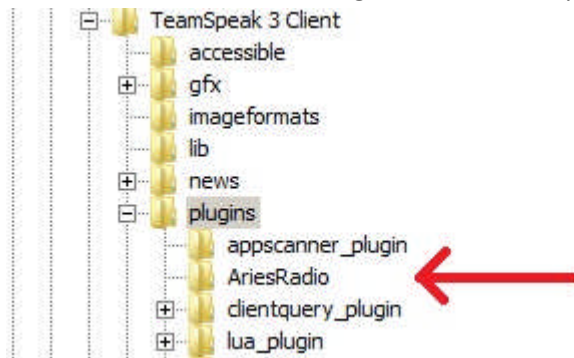

3. Copy the following files from the unzip folder to the new AriesWings folder:

   AriesRadio.luac

   AriesAirborneRadio.ini

   AriesAirborneRadio.dll

   AriesConfigurator.exe

4. If not already there, create a new folder named scripts under C:\Users\[your name]\Saved Games\DCS\

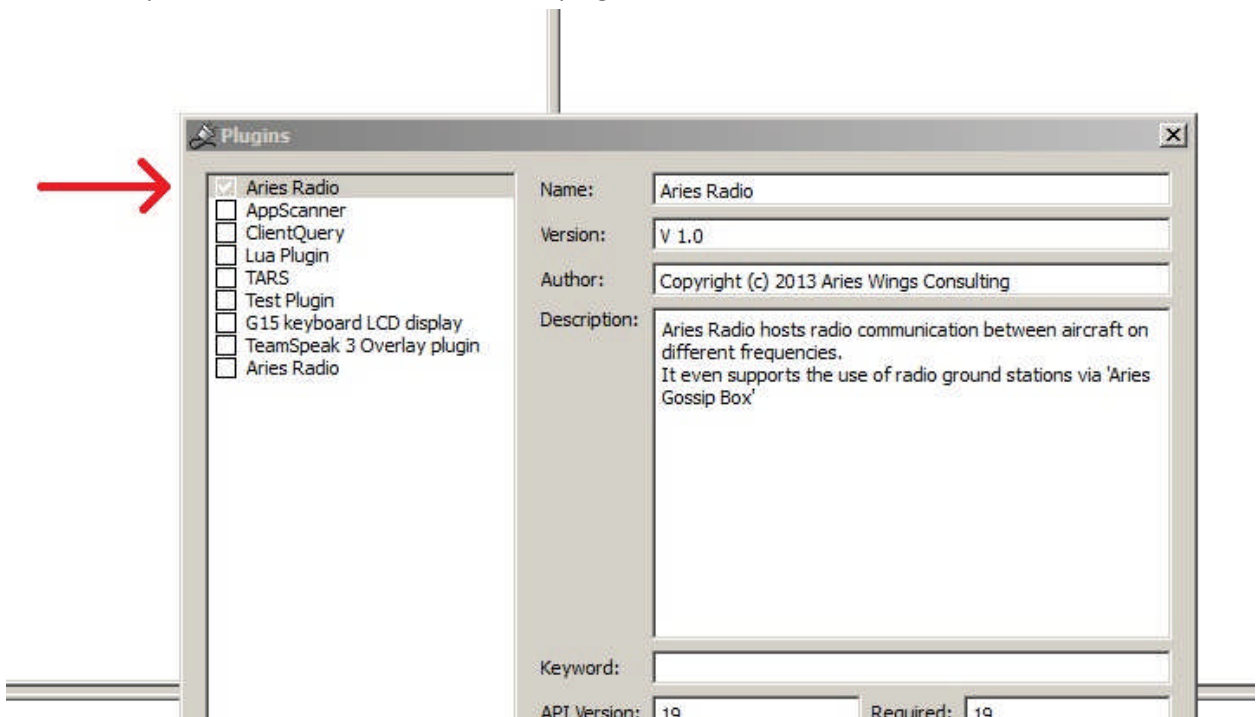

5. If no Export.lua is in the scripts folder, copy the Export.lua from the unzip folder to the scripts folder.
6. If you have already a export.lua in the scripts folder, add the following text at the last line in export.lua:

   dofile("./AriesWings/AriesRadio.luac")

7. Create a new Folder in C:\Program Files\TeamSpeak 3 Client\plugins with the name AriesRadio

8. copy the following files from the unzip folder to C:\Program Files\TeamSpeak 3 Client\plugins\ AriesRadio:

   Export.png

   Protocol.png

   EavesDropper.png

   GossipBox.png

   AriesRadio.ini

9. copy the file AriesRadio.dll from the unzip folder to C:\Program Files\TeamSpeak 3 Client\plugins

10. Now start AriesConfigurator.exe out of C:\Program Files\Eagle Dynamics\DCS World\AriesWings and Set your preferred buttons and keys for the radio control in the configuration dialog.

11. Start TeamSpeak3 and activate the AriesRadio plugin.

12. Restart TeamSpeak3

Aries Radio should be ready for use now.
